Justice Chukwuemeka

Systems Administrator

Fitchburg, WI | (608) 716-9633 | justchuk26@outlook.com | testygen01.github.io/portfolio

Summary

I am a systems administrator in the UW-Madison Job Rotation Program with hands-on infrastructure experience across Linux systems, cloud platforms, and enterprise endpoints. In my rotations I have provisioned and decommissioned Linux hosts for high-throughput computing, investigated hardware failures to root cause across power, firmware, and configuration layers, automated Jira Cloud ticket triage, contributed to a NIST 800-53 cloud security assessment, and written Terraform for AWS infrastructure stacks. Before joining UW-Madison, I spent 2 years and 9 months as an endpoint technician at UW-Stevens Point, where I managed the full workstation lifecycle and deployed operating systems via PXE boot in SCCM to more than 70 workstations.

Technical Skills

- **Systems administration:** Linux host provisioning and decommissioning, HTCondor workload operations, Puppet configuration management, hardware troubleshooting to root cause.
- **Endpoint management:** SCCM (software update deployment, PXE boot OS deployment), Ivanti ticketing system, TeamDynamics, Cherwell, Asana.
- **Cloud and automation:** Jira Cloud automation rules, Terraform for AWS infrastructure, NIST 800-53 control mapping.
- **Platforms:** Windows 10/11 and macOS installation, troubleshooting, and maintenance; Linux (current).
- **Support operations:** Full workstation lifecycle (procurement, deployment, data migration, decommissioning), ticket queue management, asset and inventory tracking, SOP documentation, technical onboarding and end-user training, printer support.
- **Diagnostics:** Root-cause troubleshooting, Event Viewer, Task Manager, Activity Monitor (macOS).

Professional Experience

University of Wisconsin-Madison, IT Job Rotation Program | Madison, WI (Hybrid) | Jul 2025 - Present
Selected for a competitive multi-disciplinary rotation program building enterprise IT expertise across support, cloud, and infrastructure teams.

Junior System Administrator, Center for High Throughput Computing | Rotation 3 | Aug 2026 - Present

- Provision and decommission Linux hosts following documented build procedures; track system state through the lifecycle.
- Troubleshoot hardware and system failures to root cause, including a down high-throughput compute node investigation spanning power, firmware, and configuration layers.
- Support HTCondor operations and apply Puppet configuration changes in a managed infrastructure.

Cloud Engineer, DoIT Public Cloud Team | Rotation 2 | Feb 2026 - Aug 2026

- Built Jira Cloud automation rules that triaged, populated, and auto-resolved repetitive alert tickets, reducing queue clutter and alert fatigue.
- Drafted cloud security assessment questions mapped to NIST 800-53 and CIS controls.
- Wrote Terraform for AWS infrastructure stacks in live sessions with the team's cloud engineering lead.

IT Support Specialist, DoIT Gen Help Desk | Rotation 1 | Jul 2025 - Jan 2026

- Resolved over 1,200 tickets for enterprise-level hardware and software issues in Cherwell.
- Documented standard operating procedures adopted for unit-wide use.
- Coordinated inventory tracking for the unit's computer lending program.

Endpoint Technician, University of Wisconsin-Stevens Point | Stevens Point, WI (On-site) | Nov 2022 - Jul 2025

- Procured workstation computer systems and deployed operating systems via PXE boot in SCCM to 70+ workstations (desktops, desktop minis, laptops with docking stations, monitors), performing the endpoint deployment.
- Installed departmental applications, migrated user data from old to new computers during workstation replacements, and set up workstations for new and existing employees on Windows (~90%) and macOS (~10%).
- Conducted basic usage training for new employees and developed video training modules that streamlined IT onboarding.
- Decommissioned workstations following organizational policy on data handling and recycling.
- Supported printers and troubleshot ad hoc printer issues.
- Managed the daily ticket queue in the Ivanti ticketing system; the team later migrated to TeamDynamics.

Education

Bachelor of Science, Computer Information Systems, University of Wisconsin-Stevens Point, May 2024.

Graduated Magna Cum Laude.

Certifications

- AWS Certified Cloud Practitioner, Amazon Web Services, Apr 2026 (expires Apr 2029).
- Google IT Support Professional Certificate (v2), Coursera, Feb 2025.
- Information Technology Fundamentals, IBM, Jan 2025.
